PROJECT PROFILE

ATTENDENCE MANAGEMENT SYSTEM:(Duration 5 months)

It is based on ItecCloud architecture. The project is developed for recording the attendance of the students on the daily basis in the institutions. This system is an innovative way to monitor and track the attendance of students. It facilitates to access the attendance information of a particular student in particular class. The main objective of this project is to computerize the manual system and reduce the time consumption. The project is totally built at administrative and thus only top management and responsible staff is given access to the software. The purpose of the project is to build cloud computing software to reduce the risk like the risk faced in web-based application.
